Wheatgrass: The powerful Super Food

EASY PHA-MAX IS THE BEST SOURCE OF WHEATGRASS

Easy Pha-max owns every step of the process of producing wheatgrass products and has won numerous awards both for its unique farming and processing techniques.

- Wheatgrass is **GROWN INDOORS**. Our wheatgrass is grown in a sterile, air-conditioned environment to guarantee that the products are 100% pollution free and are growing in optimal conditions.
- We use **ONLY ORGANIC NUTRIENTS** to feed and nourish our wheatgrass. Nutrients are developed in our laboratories using only organic raw materials. This ensures that our wheatgrass is fed with balanced and complete plant meals.
- We grow wheatgrass **AEROPONICALLY**. This means we don't use soil to grow our wheatgrass. This method allows us to use both the leaves and roots and provide the consumer with **100% WHEATGRASS**
- **CAREFUL HIGH-TECH PROCESSING**. After the wheatgrass is harvested on the 8th day, it is dehydrated using cold air through a centrifugation system and then turned into super-fine powder. This keeps all of the nutrients intact and available to the consumer.

Wheatgrass Powder

小麦胚芽

The first wheatgrass tea producer in Malaysia to be awarded the "Superbrands Malaysia 2005" status by the Malaysian Consumers and the Superbrands Council.

Awarded Silver Medal in the 28th Geneva International Exhibition of Inventions, New Techniques and Products 2000 for Indoor Aeroponic Cultivation method of wheatgrass.

WHEATGRASS
TO YOUR HEALTH

10 REASONS WHY WHEATGRASS REJUVENATES YOUR BODY!

1. A life-sustaining COMPLETE FOOD

- Provides 17 kinds of revitalizing amino acids, 13 vitamins, 10 minerals, fiber and over 100 types of enzymes.
- Dr. Charles Schnabel reported that 15 pounds of wheatgrass is equivalent to 350 lbs. of choicest vegetables in nutritional value.

2. Rich in CHLOROPHYLL

- Chlorophyll helps support healthy blood circulation due to the similar chemical structure to the "heme" in the blood.
- Dr. Yashida Hagiwara, Tokyo, Japan, suggested that the human body can transform chlorophyll into hemoglobin thus increasing red blood cell count.
- Scientists J.H. Hughs and A.L. Latner of the University of Liverpool reported in the Journal of Physiology in 1936 that animals that became anemic through bleeding were able to speed up their hemoglobin regeneration by 50% when fed with raw unrefined chlorophyll.

3. Loaded with ANTIOXIDANTS

- Rich in Superoxide Dismutase (SOD), a highly potent antioxidant enzyme that protects the DNA from free radical damage.

4. Stimulates CELLULAR REPAIR and RENEWAL

- Studies from UC San Diego show remarkable changes in the repair of damaged DNA when a compound from young grasses were introduced.
- The compound P4D1, a glycol-protein, stimulates the repair of damaged DNA.

5. Helps prevent CANCER

- Dr. Chiu-Nan Lai of the University of Texas Cancer Center reported that chlorophyll in wheatgrass juice inhibits the activity of carcinogens.
- Dr. Roderick Dashwood, University of Hawaii, confirms that chlorophyll shields the body from the effects of carcinogens from smoked meats and food molds.

6. Assists in WOUND HEALING

- In the American Journal of Surgery, Benjamin Gurskin, M.D., recommended chlorophyll for its antiseptic benefits. The article suggests that chlorophyll helps clear up foul-smelling odors, neutralize infections, heal wounds, and hastens skin grafting.
- Gahan, Kline & Finkle reported the benefits of chlorophyll in the treatment of gastrointestinal ulcers and colitis.

7. Good for INTERNAL CLEANSING

- Wheatgrass assists in adequate bowel movement and encourages elimination of toxins from the liver.

8. Has ANTI-INFLAMMATORY properties

- Dr. K. Kubota of the Science University of Tokyo found two glycol-proteins D1G1 and P4D1 which work alongside with SOD to have an even more potent anti-inflammatory effect than aspirin.

9. Good as DEODORIZER

- Dr. F. Howard Wescott reported that chlorophyll in wheatgrass, when taken in adequate quantities, reduces or eliminates offensive body and breath odors. His studies show it is even effective in neutralizing obnoxious bad breath due to food, beverages, tobacco, and metabolic changes.

10. A great ALKALINE food

- Wheatgrass has been called the King of Alkaline Foods. It is great as an alkalizer and helps to keep the balance of your blood pH.

EASY PHA-MAX WHEATGRASS IS ALSO RECOGNIZED AND CERTIFIED IN MANY COUNTRIES:

- Ministry of Health, Malaysia
- Food and Drug Administration, USA
- Ministry of Public Health, Thailand
- The National Agency of Drug and Food Control, Indonesia
- Ministry of Health, Labor and Welfare, Japan
- Bureau of Food and Drugs, Philippines

HOW TO USE:

Dissolve 1 packet in cold or room temperature water. Drink first thing in the morning upon waking up or in between meals.

Note: Best taken on an empty stomach for faster and better absorption.

Just one packet a day ensures significant health benefits. Increase amount of intake to benefit your health condition and lifestyle.

To attain optimal health, combine with a healthy diet, regular exercise, positive attitude, ample rest and high-quality Easy Pha-max wheatgrass products.

INGREDIENTS:

100% wheatgrass, leaves and roots included.
